DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 50 is rejected under 35 U.S.C. 102(b) as being anticipated by Fischbein (US 3,829,969).

Fischbein teaches a protective layer of an alloy of a first metal selected from a group including rhenium and ruthenium, and a second metal selected from a group including chromium. An example in the table of Columns 9-10 includes 71 at% Cr and 29 at% Ru.

Allowable Subject Matter

Claims 1-15, 18-40, 48, 49, and 51-57 are allowed.

Response to Arguments

Applicant's amendments and comments have overcome the rejections over Schutz '733, Czech '712, Jackson '244, Kapoor '146, Prasad '263, Cybulsky '875, Czech '885, and Leverant '141.

Applicant's remarks with regard to the rejection over Fischbein have been considered but are not persuasive. The use of the term "barrier" is not considered to lend structural definition to the coating taught by Fischbein. The layer taught by Fischbein serves as a protective layer and therefore is considered to be a barrier layer as it provides a barrier to at least some components. Applicant states that Fischbein has an exceptionally thin coating. There is no thickness recited in the instant claims, therefore this argument is not considered commensurate.

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
